Shahbaz Ahmed Khurshid

Fullstack Developer

Experience

- **Principle Software Engineer**

Architecting and implementing scalable software solutions. Developed and deployed robust software architecture for a various platforms.

- **Technical Lead**

Adapted to diverse development roles, gaining proficiency in Solidity and blockchain-based backend systems for Web 3.0 solutions.

Led backend development for multi-tenancy projects, implementing key functionalities in React for the admin portal and collaborating with the Flutter team to ensure smooth cross-platform integration, reducing integration time by 20%

- **Sr. Fullstack Developer**

Built an AI-powered interview preparation platform using Yii2 and Vue.js, offering dynamic practice sessions, real-time feedback, and personalized learning paths.

Leveraged LLMs to generate dynamic interview questions and provide real-time feedback, enhancing learning effectiveness and user engagement.
